

# PTO Tracker

## Business Requirements - Current Build

What the application does today · 2 October 2026 · branch main @ fdec63b

### How to read this

- This describes what the app does **today**, not what is planned.
- Grouped by tab, then by requirement.
- Reset and renewal rules are in Section 3. The roster is in 3.4.
- Every rule here was read from the live code, not from memory.

## 1. Scope, Roles and Access

### 1.1 Purpose

- Replaces the old Google Sheets PTO Tracker.
- One place to file leave, approve leave and see balances.
- Covers two regions: Philippines (PH) and United States (US).

### 1.2 How it is built

- React and TypeScript front end, hosted on Vercel.
- Supabase holds employees, accounts, requests and approver routing.
- EmailJS sends the notification emails.
- Microsoft 365 calendar is read in; approved leave is pushed out.

### 1.3 Roles

- **Employee** - files own leave, sees own history and own balance only.
- **Management** - all Admins, plus Princes by her email address.
- **Admin** - everything Management can do, plus approve, reject, edit and manage accounts.
- The role comes from the account, not from the job title.
- Admin today: Princes Aloha Gomez, April Lopez, Eduardo Bonto, Will Berget.
- Management today: those four, plus Princes - who is already an Admin.

### 1.4 Access rules

- No public sign-up. An Admin creates every account.
- Every new account is forced to change its password at first sign-in.
- A revoked account cannot sign in.
- A wrong password, an unknown email and a revoked account all fail the same way.
- Everyone lands on **PTO Requests** after signing in.

## 1.5 The four tabs

| Tab                | Who sees it     | What it is for                      |
|--------------------|-----------------|-------------------------------------|
| PTO Requests       | Everyone        | File leave and view the leave log   |
| PTO Tracker        | Management only | Team-wide allowances and balances   |
| PTO Calendar       | Everyone        | Month view of who is out            |
| Account Management | Admin only      | Create and control sign-in accounts |

## 1.6 Screens outside the menu

- Login, and the forced first-login password change.
- Request detail page - the target of email deep links.
- Email Notification Preview - Management, via the mail icon in the header.
- Respond page - public, no login, for the Approve / Decline email links.

## 2. TAB - PTO Requests (everyone)

### 2.1 Purpose

- The leave log. This is the default landing page for every role.

### 2.2 What each role sees

- Employee: own requests only, plus their own balance card beside the table.
- Management: every request filed, with employee and department columns.

### 2.3 Filters (Management only)

- Search by name, notes, coverage or request ID.
- Employee (Admin only), Department, Status, Paid / Unpaid, From date, To date.
- Reset clears every filter at once.

### 2.4 Counters above the table

- Number of requests, total days, pending count, approved count.
- Counters always follow the current filter.

### 2.5 Actions

- **File a Leave** - available to everyone.
- **Export CSV** - Management only. Exports the filtered view, not the whole log.
- **My PTO Balance** - Management only. Employees see the balance card instead.
- Click any row to open the full request.

### 2.6 CSV export columns

- Team Member, Department, Request Date, Start Date, End Date, Days, Status, Coverage / POC, Notes, Paid / Unpaid.

## 2.7 Filing a leave - required fields

- Team member. Locked to yourself unless you are an Admin.
- Type of leave.
- Date from.
- Coverage / POC - who covers the work.
- Reason is optional.

## 2.8 Filing a leave - how days are counted

- Only weekdays count. Saturdays and Sundays are skipped.
- A full-day range always charges at least 1 day.
- Half Day (AM) or Half Day (PM) charges 0.5 day.
- Custom Hours charges hours divided by 8, rounded to the nearest half day.
- Leave type "Half Day Leave" forces a single day and an AM / PM duration.
- End date cannot be before the start date.
- The earliest selectable date is 1 January 2026.
- A notice appears if someone else in the same department is already off on those dates.

## 2.9 Paid or unpaid

- Pay status follows the leave type.
- "Unpaid Leave" files as Unpaid. Every other type files as Paid.
- Anyone not yet eligible files as **Unpaid**.

**Going over your balance does NOT make the leave unpaid. It stays Paid and the balance goes negative. This was asked for on purpose.**

## 2.10 The balance warning at filing

- The check is made as of the leave's **start date**, not today.
- Available = what will have accrued by then, minus days used, minus pending days.
- If short, a warning shows the shortfall.
- The request can still be filed. The warning does not block it.

## 2.11 Submit flow

- A review screen shows every detail before the request is sent.
- Employees always submit as **Pending**.
- Admins can choose the status when filing on someone's behalf.
- A reference number is shown on success.

## 2.12 The four statuses

| Status    | Meaning                | Effect on balance                |
|-----------|------------------------|----------------------------------|
| Pending   | Filed, awaiting review | Shown separately, never deducted |
| Approved  | Signed off             | Deducts, if Paid                 |
| Rejected  | Refused                | Never deducts                    |
| Cancelled | Pulled back            | Never deducts                    |

## 2.13 Cancelling a request

- The employee, or an Admin on their behalf, can cancel.
- Only while the request is Pending or Approved.
- Rejected and Cancelled are final. They cannot be reopened.
- A reason is optional.
- Cancelling approved leave also removes it from the Microsoft calendar.

## 2.14 Admin edit of a request

- Admin only. Not available once a request is Cancelled.
- Editable: leave type, dates, duration, days, paid / unpaid, coverage, reason.
- Not editable: status, employee, request date.
  - Status has its own approve / reject / cancel actions, which send the emails.
  - Reassigning leave to another person is not a correction - cancel and re-file.
- Every edit is written to the request timeline.
- Editing approved leave updates the Microsoft calendar event in place.

## 2.15 Request detail view

- Employee identity, role, department and email.
- Mini balance strip: Accrued, Used, Pending, Remaining.
- Full request facts, rejection reason and any admin comment.
- Timeline of every event: Submitted, Reviewed, Approved, Rejected, Cancelled, Updated.

# 3. Entitlement, Reset and Renewal

This is the section to read if nothing else. It decides how many days each person gets, when their balance goes back to zero, and what they lose.

## 3.1 The four dates that drive everything

- **Hire date** - stored by an Admin. Drives the yearly increase and the reset.
- **Eligibility date** - calculated. Says when leave can first be taken.
- **Eligibility override** - optional, set by an Admin. Replaces the eligibility date and becomes the reset anchor.
- **PTO year start** - calculated. The date the balance resets.

### 3.2 Eligibility - when leave can first be taken

| Who                          | Eligible from           |
|------------------------------|-------------------------|
| US staff, any plan           | Hire date - day one     |
| Territory Managers, PH or US | Hire date - day one     |
| All other PH staff           | Hire date plus 6 months |
| Anyone with an override      | The override date       |

- Before the eligibility date: entitlement is 0, the balance reads 0, and leave files as Unpaid.
- A request can still be filed before eligibility. It is simply unpaid.

### 3.3 Annual entitlement - days per year

| Group           | Starts at         | Increase                | Cap     |
|-----------------|-------------------|-------------------------|---------|
| PH staff        | 5 days            | +2 per hire anniversary | 10 days |
| Tenure ramp     | 10 days           | +1 per hire anniversary | 15 days |
| US - fixed plan | Negotiated figure | None, ever              | n/a     |

- Every increase counts anniversaries of the **hire date**, for every group.
- Entitlement is always calculated. It is never typed in.
- Job title and hire date are the only levers on it.
- The tenure ramp reaches its 15-day cap at 5 years of service.
- The tenure ramp covers both regions. Every Territory Manager is on it, plus the three US staff who start on ten days.
- Territory Managers used to take a flat 10 with no increase. They now climb like everyone else on the ramp.

### 3.4 Who is in each group - the roster today

- 27 people on the roster. Day counts are as of 2 October 2026 and move on each person's own reset date.
- "Resets on" is the day their PTO year turns over, every year.

PH staff - the standard ramp. 5 days, +2 per hire anniversary, capped at 10.

| Name                       | Role                        | Hire date  | Eligible from | Resets on | Days |
|----------------------------|-----------------------------|------------|---------------|-----------|------|
| Princes Aloha Gomez        | Team Manager                | 2025-12-08 | 2026-06-08    | 8 Dec     | 5    |
| Kazutomo Nishimura         | Executive Assistant         | 2022-09-26 | 2023-03-26    | 26 Sep    | 10   |
| April Lopez                | Executive Assistant         | 2025-01-08 | 2025-07-08    | 8 Jan     | 7    |
| Jlydie Bagasala            | Vendor Success Specialist   | 2023-07-10 | 2024-01-10    | 10 Jul    | 10   |
| Mabel Rojas                | Order Processing Lead       | 2025-06-30 | 2026-06-30    | 30 Jun    | 7    |
| Veam Chavez                | Technical Admin Assistant   | 2025-06-23 | 2026-06-23    | 23 Jun    | 7    |
| Sharlyn Bacalso            | Invoicing Specialist        | 2026-01-26 | 2026-07-26    | 26 Jan    | 5    |
| Elysabel Del Rosario       | Executive Assistant         | 2026-04-20 | 2026-10-20    | 20 Apr    | 0    |
| Justin Mar Tizon           | Order Processing Specialist | 2026-04-13 | 2026-10-13    | 13 Apr    | 0    |
| Victor Joshua Estacio      | Applications Engineer       | 2026-05-26 | 2026-11-26    | 26 May    | 0    |
| Eduardo Bonto              | Administrator               | 2026-08-12 | 2027-02-12    | 12 Aug    | 0    |
| Eduardo Bonto Test Account | Order Processing Specialist | 2026-09-19 | 2027-03-19    | 19 Sep    | 0    |

- The last five are **not yet eligible**. They show 0 days until the date in "Eligible from".
- Every one of them now resets on their own hire anniversary. Princes, Kazutomo, April and Jlydie used to be pinned to 1 June by a leftover override.
- A first cycle can be short. Sharlyn Bacalso runs 26 Jul 2026 to 25 Jan 2027, then resets every 26 January.

US - fixed plan. A negotiated figure that never grows with tenure.

| Name             | Role                   | Hire date  | Resets on | Days |
|------------------|------------------------|------------|-----------|------|
| Chris Stolzer    | Inside Sales           | 2008-08-11 | 11 Aug    | 20   |
| Darlene Driscoll | Office Admin           | 2008-08-18 | 18 Aug    | 20   |
| Janet Hays       | Warehouse Manager      | 2021-08-09 | 9 Aug     | 20   |
| Ryan Driscoll    | Inside Sales           | 2011-09-06 | 6 Sep     | 20   |
| Russ Bailey      | Outside Sales Engineer | 1990-06-13 | 13 Jun    | 20   |
| Jason Bauman     | Outside Sales Engineer | 2006-07-15 | 15 Jul    | 20   |
| Steven Limanni   | Outside Sales Engineer | 2009-12-01 | 1 Dec     | 20   |
| Nancy Mullen     | Director of Operations | 2007-12-03 | 3 Dec     | 20   |

- All eight are eligible from day one, and none of them ever gains a day.
- This is the "as is" group from the policy email. Everyone here is on 20.

**Tenure ramp - both regions.** 10 days, +1 per hire anniversary, capped at 15 at five years of service.

| Name            | Role                   | Reg | Hire date  | Resets on | Days | Hits 15 on  |
|-----------------|------------------------|-----|------------|-----------|------|-------------|
| Cleon Kemp      | Territory Manager      | PH  | 2024-10-14 | 14 Oct    | 11   | 14 Oct 2029 |
| Josh Kirk       | Territory Manager      | PH  | 2025-02-17 | 17 Feb    | 11   | 17 Feb 2030 |
| Amr Shweiky     | Territory Manager      | PH  | 2025-02-17 | 17 Feb    | 11   | 17 Feb 2030 |
| Dylan Lavern    | Territory Manager      | PH  | 2026-06-15 | 15 Jun    | 10   | 15 Jun 2031 |
| Dan York        | Outside Sales Engineer | US  | 2025-01-06 | 6 Jan     | 11   | 6 Jan 2030  |
| Darwin Mushrush | Outside Sales Engineer | US  | 2026-01-12 | 12 Jan    | 10   | 12 Jan 2031 |
| Will Berget     | Operations Manager     | US  | 2026-08-19 | 19 Aug    | 10   | 19 Aug 2031 |

- All seven are eligible from day one, so the ramp starts on their first day.
- Cleon, Josh, Amr and Dan read 11 rather than 10 because each already has a completed year of service.
- The four Territory Managers are on the ramp by **job title**, so a new one joins it automatically. The three US staff are on it by a stored plan field.
- Matched on the exact title "Territory Manager". A retitle drops someone off the ramp and off day-one eligibility.

**Not live yet. The code change ships with the next deploy, but patch\_017 and patch\_018 have not been run against the database. Until they are, the four on 1 June still reset there, and Will Berget stays on the fixed plan.**

### 3.5 The PTO year - when the balance resets

- Each employee has their **own** PTO year. There is no company-wide January reset.
- The anchor is the hire date. An eligibility override replaces it.
- The PTO year starts on the most recent anniversary of that anchor.
- A PTO year can never start before the eligibility date.
- For a PH hire, the first cycle is short. It runs from the eligibility date to the first hire anniversary.

### 3.6 What happens on the reset date

- Days Used goes back to 0.
- Days Taken, Days Scheduled and Pending days all go back to 0.
- Accrued days go back to 0, then 1 day is credited the same day.
- The annual entitlement steps up on this same date, if the group has an increase.
- Leave dated before the reset stops counting against the new year.
- Old requests stay visible in the log and in the history. They just stop drawing down.

**Unused days do NOT carry over. Whatever is left at the end of a PTO year is lost.**

### 3.7 Accrual - how days are earned inside the year

- Days are earned through the year. They are not granted up front.
- 1 day is credited on the PTO year start date.
- Another day is credited every 14 days after that.

- Accrual stops once the annual entitlement is reached.
- A 10-day entitlement is fully earned after 10 periods - about 4.5 months.
- A 5-day PH entitlement is fully earned in about 10 weeks.
- Accrual is anchored to each person's own PTO year, not to payroll dates.
- Accrual has a single on / off switch. Switched off, everyone gets the full year up front.

### 3.8 How the balance is worked out

| Figure                 | Meaning                                             |
|------------------------|-----------------------------------------------------|
| <b>Total PTO</b>       | The whole year's entitlement                        |
| <b>Accrued</b>         | What has been earned so far this PTO year           |
| <b>Still to accrue</b> | Total PTO minus Accrued                             |
| <b>Days Used</b>       | All Approved and Paid leave in this PTO year        |
| <b>Days Taken</b>      | Approved and Paid leave that has already started    |
| <b>Days Scheduled</b>  | Approved and Paid leave still in the future         |
| <b>Pending</b>         | Days in unreviewed requests - shown, never deducted |
| <b>Days Remaining</b>  | Accrued minus Days Taken                            |
| <b>% Used</b>          | Days Used divided by Total PTO                      |

### 3.9 What does and does not deduct

- Deducts: Approved **and** Paid.
- Does not deduct: Pending, Rejected, Cancelled, or any Unpaid leave.
- Future approved leave shows as Scheduled. It does not reduce today's Remaining.
- Days Remaining is allowed to go negative. A negative shows in red.
- Anyone not yet eligible shows 0 remaining.

### 3.10 Worked example - PH employee

- Hired 8 January 2025. Not a Territory Manager.
- Eligible 8 July 2025, six months in. Entitlement 5 days.
- First PTO year runs 8 July 2025 to 7 January 2026.
- 8 January 2026 - resets. Used goes to 0. Entitlement rises to 7 days. 1 day accrues.
- 22 January 2026 - 2 days accrued. Then +1 every fortnight, stopping at 7.
- 8 January 2027 - resets again. Entitlement rises to 9 days.
- 8 January 2028 - reaches the 10-day cap, and stays there every year after.

### 3.11 Worked example - tenure ramp

- Eligible on day one. Starts at 10 days.
- +1 day on every hire anniversary.
- Reaches the 15-day cap at 5 years of service, then holds.
- The reset lands on that same hire anniversary.

### 3.12 Eligibility overrides

- An Admin sets the override on the PTO Tracker tab.
- It replaces the calculated eligibility date.
- It also becomes the reset anchor, so it moves the whole PTO year.
- It does **not** move the US tenure ramp. Years of service stay years of service.
- Clearing the override returns the employee to the normal rule.

## 4. TAB - PTO Tracker (Management only)

### 4.1 Purpose

- The team-wide view of allowances, eligibility and balances.
- Mirrors the old spreadsheet, column for column.

### 4.2 Summary cards

- Total Members - active employees only.
- Eligible.
- Not Yet Eligible.
- Total PTO Pool - the sum of everyone's annual entitlement.

### 4.3 Filters

- Search by name, email or role.
- Department.
- Eligibility: all, eligible only, or not yet eligible.

### 4.4 Table columns

- Name, Role, Department, Hire Date, Eligibility Date, Eligible, Total PTO, Days Used, Days Remaining, % Used.

### 4.5 Colour coding

- Eligible is green. Not eligible is red.
- % Used: under 36% green, 36 to 50% yellow, 51 to 89% orange, 90% and over red.

### 4.6 Employee drawer - stored versus calculated

- **Stored**, editable by an Admin: name, job title, department, hire date, eligibility override.
- **Calculated**, read-only: eligibility date, eligible yes/no, annual allowance, accrued, still to accrue, days used, taken, scheduled, pending, days remaining, % used.
- The drawer also lists that employee's full request history.

### 4.7 Admin edit rules

- Changing the job title or the hire date changes the entitlement and the reset date.
- Email and application role are changed in Account Management, not here.
- There is deliberately no allowance field. The number is always derived.
- An edit also updates the matching account record, so the two tabs agree.

## 5. TAB - PTO Calendar (everyone)

### 5.1 Purpose

- Month-by-month view of who is out.
- Visible to every role. There is no personal filter.

### 5.2 Filters

- Department, Employee, Leave type.
- "Show pending on calendar" toggle, on by default.

### 5.3 Behaviour

- Approved leave always shows. Pending shows only when the toggle is on.
- Each day cell shows up to 3 entries, then "+N more".
- The colour follows the employee's department.
- Click an entry to open the full request.
- Admins can approve or reject a pending request straight from the drawer.

### 5.4 Microsoft 365 overlay

- Company events, holidays and shutdowns from the shared org calendar are overlaid.
- Read-only. Not clickable. Never stored.
- Fetched for the visible month only.
- If the integration is off or unreachable, the calendar still works on PTO data alone.
- Personal calendars are out of scope. Only the one org calendar is read.

## 6. TAB - Account Management (Admin only)

### 6.1 Purpose

- Provision and control sign-in accounts. Invite-only, by design.

### 6.2 Filters and columns

- Filters: search, application role, status.
- Columns: Email, Full Name, Application Role, Job Title, Department, Status, Created, Actions.
- A "Password change pending" flag shows under the email until the first change is done.

### 6.3 Create an account

- Required: a valid work email, full name and hire date.
- The email must be unique.
- Also set: application role, job title, department, allowance, temporary password.
- Creates both an employee record and a sign-in account.

**The hire date drives eligibility, the yearly increase and the reset date. Getting it wrong changes someone's entitlement.**

- New accounts default to the PH region and the fixed plan.

- US region and the tenure ramp can only be set in the database today.

## 6.4 Temporary password

- No email is sent. The Admin shares it directly.
- The employee is forced to change it at first sign-in.

## 6.5 Reset password

- Generates a new temporary password.
- Forces another password change at the next sign-in.
- No email is sent.

## 6.6 Revoke and restore

- Revoke blocks sign-in. The PTO history stays attached to the person.
- Restore puts the account back to Active.

## 6.7 Delete

- Deletes the account **and** the employee record.
- That employee's PTO requests are deleted with them.
- It cannot be undone. Revoke is the safer option.

# 7. Approvals and Notifications

## 7.1 Who receives a new request

- Most specific rule wins:
  - 1. A manager mapped to the employee's job title.
  - 2. A manager mapped to the employee's department.
  - 3. Default - Will and Princes together.
- The filer is never an approver of their own leave.
- If that leaves nobody, it falls back to all other Admins, then to Princes alone.
- Princes is cc'd whenever she is not already an approver.
- Routing is configured in the database, not in code.

## 7.2 The four emails

| Email             | Goes to                              | Carries action links      |
|-------------------|--------------------------------------|---------------------------|
| New request       | The approver                         | Yes - Approve and Decline |
| Request submitted | The filer only                       | No                        |
| Request reviewed  | The filer                            | No                        |
| Request cancelled | Approver route, cc Princes and filer | No                        |

- The filer is never cc'd on the new-request email. It carries live approve links.

## 7.3 Approve or decline from the email

- Each link is single-use and expires.

- It opens a public page. No app login is needed.
- A used or expired link falls back to a deep link into the app.
- Declining asks for a reason.

#### 7.4 Email Notification Preview

- Management only, via the mail icon in the header.
- Shows exactly what each email looks like for any request.
- Shows whether live sending is actually configured.

#### 7.5 Calendar sync

- Approving pushes the leave to the shared Microsoft calendar.
- Editing approved leave updates that event in place.
- Cancelling removes the event.

## 8. Things to Watch

Factual quirks in the current build. None of these are broken, but all of them surprise people.

- The app name in the interface still reads "Valveman PTO Tracker".
- Territory Manager rules match the exact job title. "Senior Territory Manager" would silently lose both the tenure ramp and day-one eligibility.
- The stored annual allowance field is written when an account is created, but no calculation reads it.
- Accrual has one on / off switch. Switched off, everyone gets their full year up front.
- An email type with no template configured fails silently. Nothing is sent and nothing errors.
- Dashboard, Employees and File-a-Leave pages still exist as routes, but are not in the menu.
- "Not Yet Eligible" counts all employees. "Total Members" counts active ones only.
- Sign-in holds a local pointer to the user, not a real auth session token.
- Leave filed before someone is eligible is unpaid, and stays unpaid even after they become eligible.
- patch\_017 and patch\_018 are written but not yet run against the live database. Until they are, the stored data disagrees with this document in two places: the four 1 June overrides, and Will Berget's plan.
- Account creation always writes the fixed plan. A new US hire on ten days needs the plan set by hand; a new Territory Manager does not, because the job title covers them.
- "Eduardo Bonto Test Account" is a live employee record. It shows on the PTO Tracker tab and in the Total Members count.
- Chris Stolzer's eligibility override still reads 2026, while every other US override was synced to the real hire date. It changes nothing he is owed - only the date his row displays.
- Sheet numbers 15 and 16 are missing from the roster. 15 was a phantom record that was removed.
